CRITERIA FOR DETERMINING TEAM PLACEMENTS FOR FINAL.

WIN = Two (2) points

DRAW = One (1) point

LOSS = Zero (0) points

In the event of teams being equal on points for any position following the rounds, the following criteria shall be used to determine team placement for the final round:

The positions of teams on equal points shall be determined by **defensive runs**. The team with the lower defensive runs will occupy the higher position.

If two teams remain tied, then the positions will be determined firstly, by the **winner of the-head to-head** game/s during round/s and if still tied, by the **toss of a coin**.

If three teams are tied on points and **defensive runs** the **head-to-head** results played between those three teams in the round robin shall be considered. Where one team has **won both matches** against the other two teams it is tied with in the round robin, this team shall take the higher ladder position. The next two ladder positions between the remaining two tied teams would be determined by the **head-to-head** match between those two teams in the round robin and if still tied, then by the **toss of a coin**.
